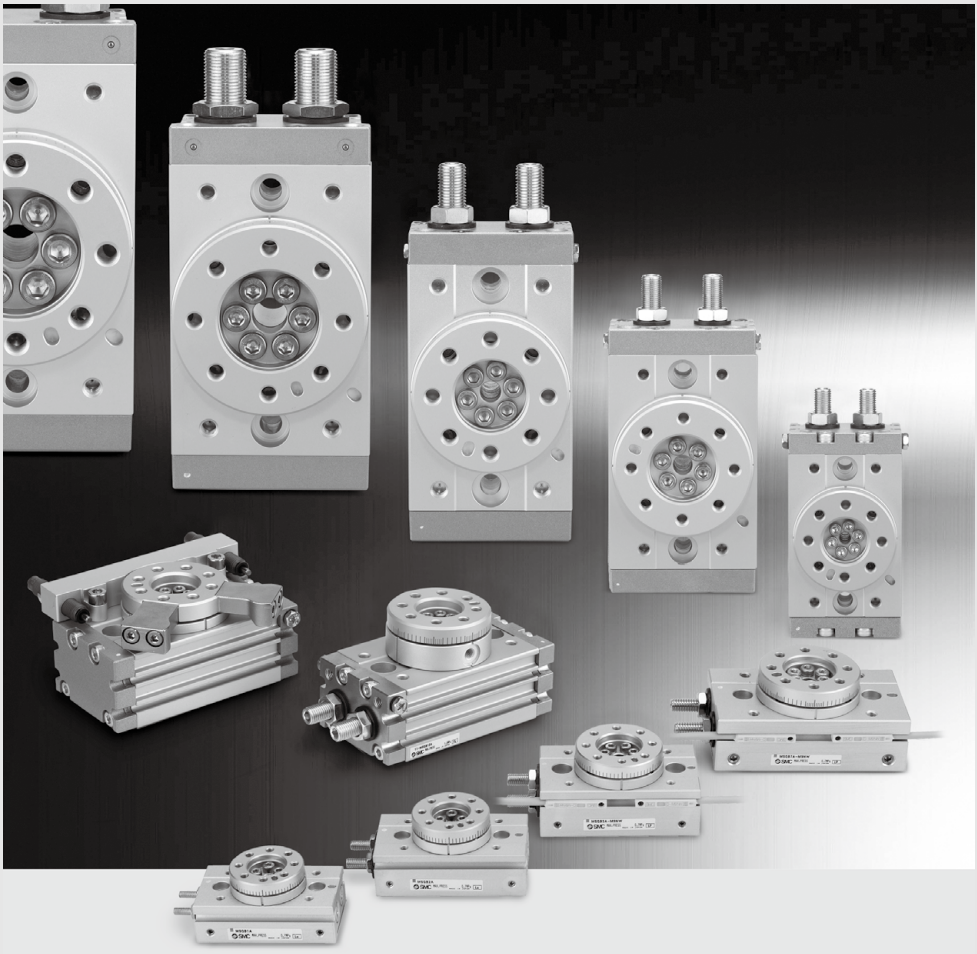
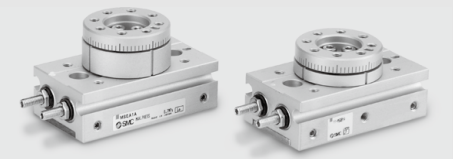
Rotary Table/Rack & Pinion Type

MSQ Series

Size: 1, 2, 3, 7, 10, 20, 30, 50, 70, 100, 200

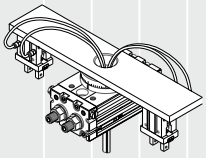


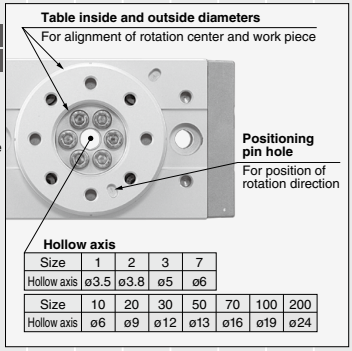


Compact Rotary Table with Low Table Height

Easy mounting of workpiece.

- **Table I.D/O.D tolerances**
  Basic type: **MSQB** H9/h9
  High precision type: **MSQA** H8/h8
- **Positioning pin hole**
- **Hollow axis**
  Accommodates wiring and piping for equipment mounted on the table





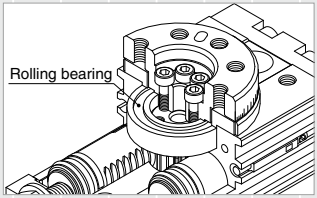
Hollow axis

Size	1	2	3	7
Hollow axis	ø3.5	ø3.8	ø5	ø6

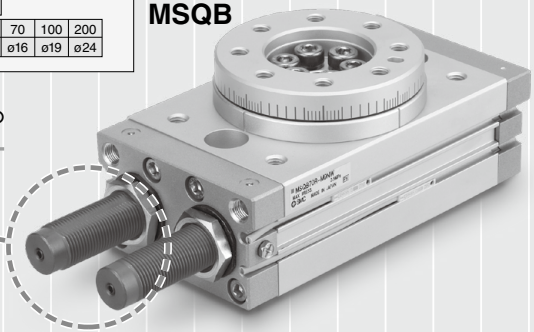
Size	10	20	30	50	70	100	200
Hollow axis	ø6	ø9	ø12	ø13	ø16	ø19	ø24

Large rolling element bearing

3 to 4 times higher axial load
(compared with the CRQ series)



Basic type
MSQB



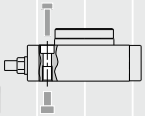
Pivoting angle adjustment range: 0 to 190°

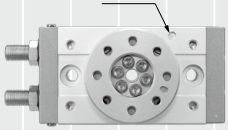
With internal shock absorber

2 to 5 times more kinetic energy
(compared with an adjustment bolt)

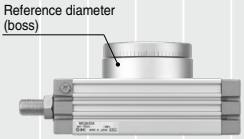
Easy mounting of body

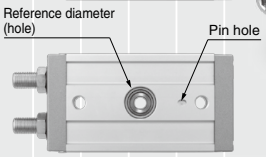
- **Reference dia: Boss, Hole**
- **Mounting from 2 directions**
- **Positioning pin hole**





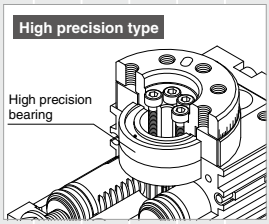
High precision type
MSQA





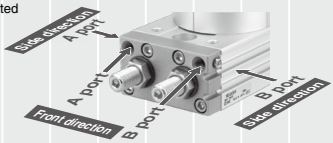
Movement in direction of table's radial thrust: 0.01mm or less

By using high precision bearing, the movement in the direction of table's radial thrust is reduced.

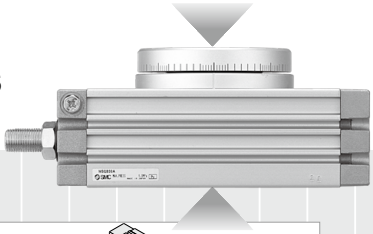


Piping from 2 directions (front and side) is possible

Piping position can be selected accommodate mounting conditions

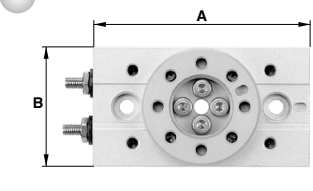


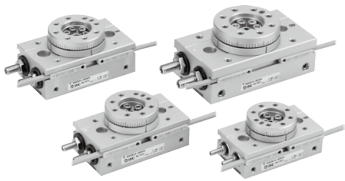
SMC

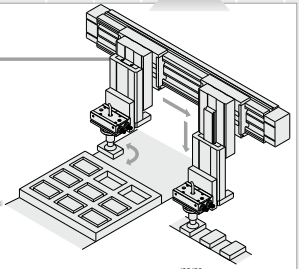


Small sizes 1, 2, 3, and 7

Small size and light weight







Full size (Picture of MSQB1A)

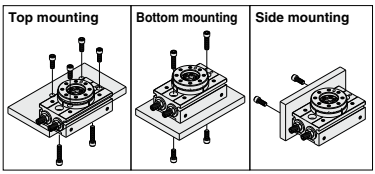
Measure mm

Size	Model	A	B	C	D	Weight (g)
1	MSQB1A	50.5	28	25	16	70
2	MSQB2A	56	30	28	18	105
3	MSQB3A	60	34.5	30.5	20.5	150
7	MSQB7A	73.5	41	34.5	23	250

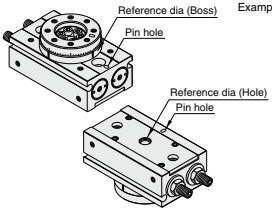
Variety of installation options for space saving

Offers maximum space saving installation by taking advantage of the compact body, space saving wiring and piping.

Free mount

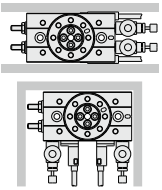


Easy center alignment at mounting



Wiring and piping can be selected according to mounting conditions

Example of auto switch and speed controller mounting



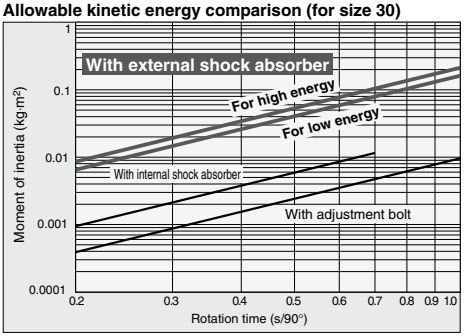
External shock absorber types

4 to 10 times more allowable kinetic energy

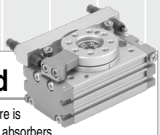
(Compared with internal shock absorber type)

2 types of shock absorbers are available, for low energy and high energy.

Allowable kinetic energy comparison (for size 30)



Total length shortened



Longitudinal mounting space is reduced because there is no protrusion from adjustment bolts or internal shock absorbers.

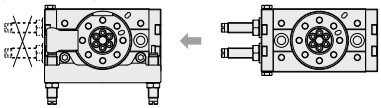


Table height is the same for both types with adjustment bolts or internal shock absorbers.

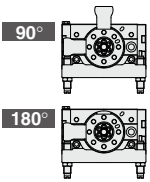
Rotation angle: 90°, 180°



Left / Right symmetric type

∗ The port location cannot be changed after the delivery of the product.

Moisture Control Tube IDK Series

When operating an actuator with a small diameter and a short stroke at a high frequency, the dew condensation (water droplet) may occur inside the piping depending on the conditions.
Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the **Web Catalog**.

Applicable Auto Switches /Refer to pages 929 to 983 for detailed auto switch specification.

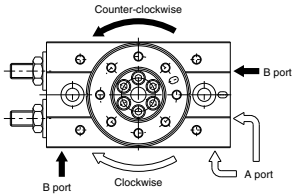
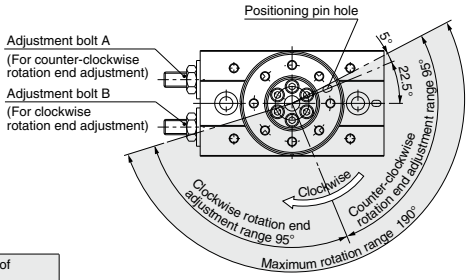
Size	BK	PA
1	5.3	M3 x 0.5
2	7.5	M3 x 0.5
3	9.5	M3 x 0.5
7	7	M5 x 0.8

Dimensions other than above are identical to the basic type and the high precision type.

Rotation Direction and Rotation Angle

- The rotary table turns in the clockwise direction when the A port is pressurized, and in the counter-clockwise direction when the B port is pressurized.
- By adjusting the adjustment bolt, the rotation end can be set within the range shown in the drawing.





With adjustment bolt, internal shock absorber

Size	Adjustment angle per rotation of angle adjustment screw
1	8.2°
2	10.0°
3	10.9°
7	10.2°

Note) • The drawing shows the rotation range of the positioning pin hole.
• The pin hole position in the drawing shows the counter-clockwise rotation end when the adjustment bolts A and B are tightened equally and the rotation is adjusted 180°.

Rotation Range Example

- Various rotation ranges are possible as shown in the drawings below using adjustment bolts A and B.
(The drawings also show the rotation ranges of the positioning pin hole.)

High precision type/MSQA

Basic type/MSQB

Specifications

Size			10	20	30	50	70	100	200
Fluid			Air (non-lube)						
Maximum operating pressure	With adjustment bolt		1 MPa						
	With internal shock absorber		0.6 MPa Note 1)						
Minimum operating pressure	Basic type		0.1 MPa						
	High precision type		0.2 MPa	0.1 MPa			—		
Ambient and fluid temperature			0 to 60°C (with no freezing)						
Cushion	With adjustment bolt		Rubber bumper						
	With internal shock absorber		Shock absorber						
		Shock absorber model	RBA0805 -X692	RBA1006-X692		RBA1411 -X692	RBA2015-X821		RBA2725 -X821
Angle adjustment range			0 to 190° Note 2)						
Maximum rotation			190°						
Cylinder bore size			ø15	ø18	ø21	ø25	ø28	ø32	ø40
Port size	End ports		M5 x 0.8		Rc 1/8, G 1/8, NPT 1/8				
	Side ports		M5 x 0.8						

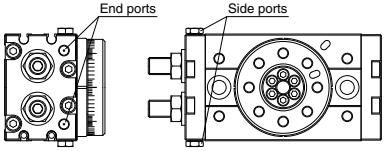
Note 1) The maximum operating pressure of the actuator is restricted by the maximum allowable thrust of the shock absorber.

Note 2) Be careful if the rotation angle of a type with internal shock absorber is set below the value in the table below, the piston stroke will be smaller than the shock absorber's effective stroke, resulting in decreased energy absorption ability.

Size	10	20	30	50	70	100	200
Minimum rotation angle that will not allow decrease of energy absorption ability	52°	43°	40°	60°	71°	62°	82°

The service life of the shock absorber may be different from the rotary table body depending on the operating conditions. Refer to Specific Product Precautions for the suitable replacement period.

Symbol



Allowable Kinetic Energy and Rotation Time Adjustment Range

Size	Allowable kinetic energy (J) Note 1)		Rotation time adjustment range for stable operation (s/90°)	
	With adjustment bolt	With internal shock absorber	With adjustment bolt	With Note 2) internal shock absorber
10	0.007	0.039	0.2 to 1.0	0.2 to 0.7
20	0.025	0.116		
30	0.048	0.116		
50	0.081	0.294		
70	0.240	1.100	0.2 to 1.5	0.2 to 1.0
100	0.320	1.600	0.2 to 2.0	
200	0.560	2.900	0.2 to 2.5	

Note 1) If operated where the kinetic energy exceeds the allowable value, this may cause damage to the internal parts and result in product failure. Please pay special attention to the kinetic energy levels when designing and during operation to avoid exceeding the allowable limit.

Note 2) When the rotation time of the type with an internal absorber is set longer than the time shown in the table above, energy absorption of the shock absorber greatly decreases.

Weight

∗1 Although it is possible to mount water resistant type auto switches, note that the rotary actuator itself is not of water resistant construction.
∗2 1 m type lead wire is only applicable to D-A93.

∗ Lead wire length symbols: 0.5 m ······ Nil (Example) M9NW
1 m ······ M (Example) M9NWM
3 m ······ L (Example) M9NWL
5 m ······ Z (Example) M9NWZ

∗ Auto switches are shipped together, (but not assembled).

∗ Auto switches marked with a "○" are produced upon receipt of orders.

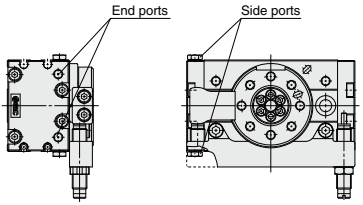
∗ Refer to pages 970 and 971 for the details of solid state auto switch with pre-wired connector.

Symbol

Specifications

Size		10	20	30	50
Fluid		Air (non-lube)			
Maximum operating pressure		1 MPa			
Minimum operating pressure		0.2 MPa			
Ambient and fluid temperature		0 to 60°C (with no freezing)			
Cushion		Shock absorber			
Shock absorber type	For low energy	RB0805	RB1006		RB1411
	For high energy	RB0806	RB1007		RB1412
Rotation		90°, 180°			
Angle adjusting range		Each rotation end ±3°			
Cylinder bore size		ø15	ø18	ø21	ø25
Port size	End ports	M5 x 0.8		Rc 1/8, G 1/8, NPT 1/8	
	Side ports	M5 x 0.8			

The service life of the shock absorber may be different from the rotary table body depending on the operating conditions. Refer to Specific Product Precautions for the suitable replacement period.



Made to Order

Made to Order

Symbol	Specifications/Description
-X232	With external adjustment bolt

Allowable Kinetic Energy and Rotation Time Adjustment Range

Size	Allowable kinetic energy (J) Note 1)		Rotation time adjustment range for stable operation (s/90°)
	Shock absorber for low energy	Shock absorber for high energy	
10	0.161	0.231	0.2 to 1.0 Note 2)
20	0.574	1.060	
30	0.805	1.210	
50	1.310	1.820	

Note 1) If operated where the kinetic energy exceeds the allowable value, this may cause damage to the internal parts and result in product failure. Please pay special attention to the kinetic energy levels when designing and during operation to avoid exceeding the allowable limit.

Note 2) Values above indicate the time between the start of rotation and the deceleration caused by the shock absorber. Although the time required by the rotary table to reach the rotation end after deceleration differs depending on the operating conditions (inertial moment of the load, rotation speed and operating pressure), approximately 0.2 to 2 seconds are required. The range of angles within which the shock absorber operates is between the rotation end and the values shown below.

Size	10	20	30	50
For low energy	7.1°	6.9°	6.2°	9.6°
For high energy	8.6°	8.0°	7.3°	10.5°

Weight

(g)

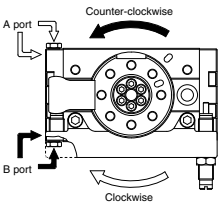
Size		10	20	30	50
Basic type	90° specification	600	1150	1460	2390
	180° specification	570	1090	1390	2280
High precision type	90° specification	670	1340	1690	2720
	180° specification	640	1290	1620	2600

Note) Values above do not include auto switch weight.

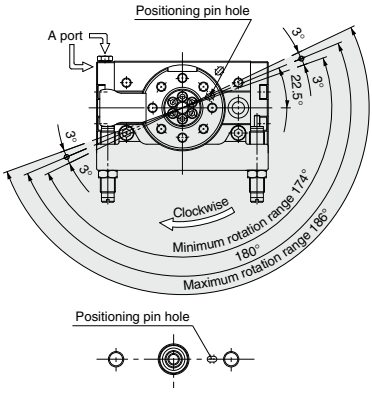
Rotation Direction and Rotation Angle

・The rotary table turns in the clockwise direction where the A port is pressurized, and in the counter-clockwise direction when the B port is pressurized.
・By adjusting the shock absorber, the rotation end can be set within the ranges shown in the drawing.

Standard type

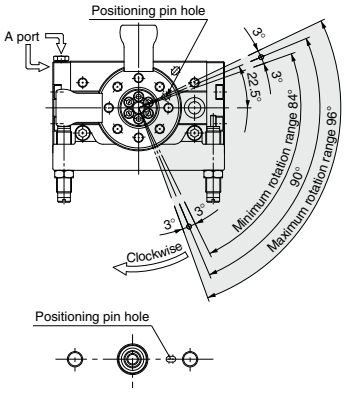


For 180°



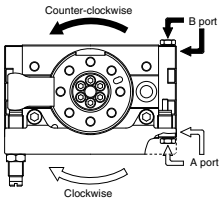
Position of bottom positioning pin hole

For 90°

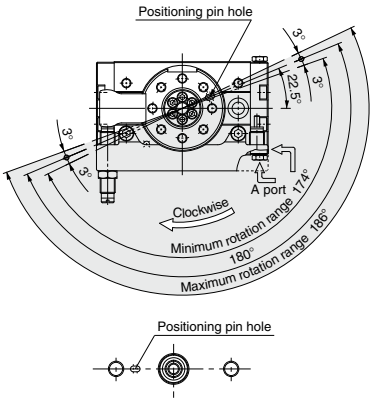


Position of bottom positioning pin hole

Symmetric type

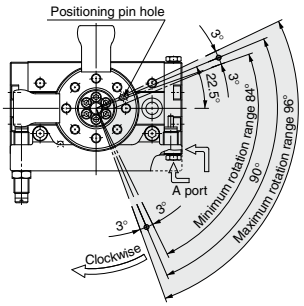


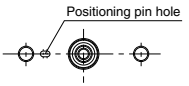
For 180°



Position of bottom positioning pin hole

For 90°





Position of bottom positioning pin hole

With external shock absorber

Size	Adjustment angle per rotation of angle adjustment screw
10	1.4°
20	1.2°
30	1.1°
50	1.3°

Note) · The drawings show the rotation range for the top positioning pin hole of the table.
· The pin hole position in the drawing shows the counter-clockwise rotation end when the shock absorbers are tightened equally and the rotation is adjusted to 180° and 90°.

50	190°	53	87	22°	5°	49	83	33°	10°
70	190°	58	99	21°	5°	54	95	30°	10°
100	190°	65	112	18°	5°	61	108	27°	10°
200	190°	85	143	15°	5°	81	139	21°	10°

Operating angle θ m: Value of the operating range Lm of a single auto switch converted to an axial rotation angle.
Hysteresis angle : Value of auto switch hysteresis converted to an angle.
Note) Since the above values are only provided as a guideline, they are not guaranteed.
In the actual setting, adjust them after confirming the auto switch operating condition.

MSQ Series
Made to Order

Please contact SMC for detailed specifications, lead times and prices.

Made to Order

1 With External Stopper

Symbol **-X232**

By reducing the effective stroke of the shock absorber, the absorption time will be reduced, enabling the cycle time to be improved.

How to Order

MSQ B 10 L 2 X – M9BW – X232

- **B**: **A** High precision type; **B** Basic type
- **10**: Size — **10**, **20**, **30**, **50**
- **L**: Shock absorber type — **L** Shock absorber for low energy; **H** Shock absorber for high energy
- **2**: Port location/Rotation — **2** Standard type 180°; **3** Standard type 90°; **4** Symmetric type 180°; **5** Symmetric type 90°
- **X**: Made to Order
- **M9BW**: Auto Switch ∗ Refer to page 354 for auto switch.
- **X232**: With external stopper

Specifications

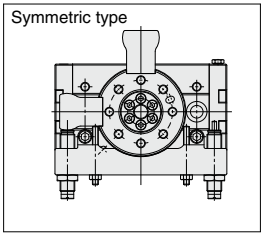
Size	Allowable kinetic energy (J)	
	Shock absorber for low energy	Shock absorber for high energy
10	0.161	0.231
20	0.574	1.060
30	0.805	1.210
50	1.310	1.820

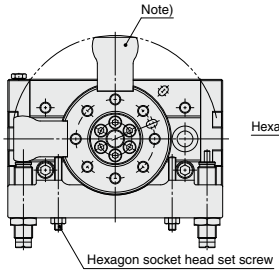
Note 1) The allowable kinetic energy indicated in the table is the value for the case where the full stroke of the shock absorber is used. Note that if the effective stroke of the shock absorber is shortened using the hexagon socket head set screw, the allowable energy will be lower than the value in the table.

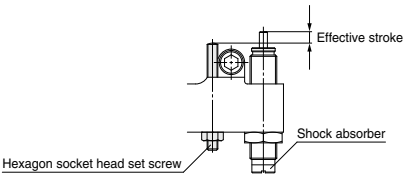
Note 2) If you wish to adjust the stroke of the shock absorber in order to reduce the cycle time, first set the shock absorber to the position where the shock absorber is to be used in the full stroke, then while observing the operating condition of the product, gradually adjust the stroke in the direction such that the effective stroke decreases.

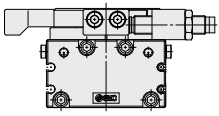
Note 3) The shock absorber is a consumable part. If there are signs, such as bounding of the shock absorber at the motion end point, that the energy absorption performance of the shock absorber has deteriorated, readjust the position of the shock absorber so as to increase its effective stroke. If bounding still occurs even when the full stroke is used, it is necessary to replace the shock absorber with a new one.

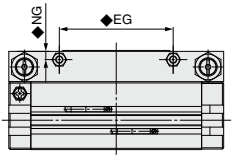
Dimensions











(mm)

Size	EG	NG
10	47.4	4.5
20	62	4.5
30	67.6	4.8
50	80	7

∗ Dimensions other than the above are the same as standard.

Note) This part is not available with 180° specification.

SMC

MSQ Series
Specific Product Precautions 1

Be sure to read this before handling the products. For safety instructions as well as rotary actuator and auto switch precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" of each product on the SMC website: https://www.smcworld.com

Speed Adjustment

⚠Warning

1. Perform speed adjustment gradually from the low speed side.
Speed adjustment from the high speed side can cause product damage leading to human injury and damage to equipment and machinery.

⚠Caution

1. When operating at high speed with a large load weight, a large amount of energy is applied to the actuator and can cause damage.
Refer to the model selection on page 32 to find the proper operating time.

2. Do not machine the fixed orifice of the port to enlarge its size. If the fixed orifice size is enlarged, the actuator operating speed and impact force will increase and cause damage.

Lubrication

⚠Caution

1. Use the product without lubrication.
This product is lubricated with grease at the factory, and further lubrication will result in a failure to meet the product's specifications.

Rotation Adjustment

⚠Caution

1. As a standard feature, the rotary table is equipped with a rotation adjustment screw (adjustment bolt or shock absorber) that can be used to adjust the rotation. The table below shows the rotation adjustment per single rotation of the rotation adjustment screw.
Please refer to following pages for the rotation direction, rotation angle and rotation angle range.
MSQ size1 to 7 → page 344
MSQ size10 to 200 → page 349
MSQ with external shock absorber → page 356

With adjustment bolt, With external shock absorber

Size	Rotation adjustment per single rotation of rotation adjustment screw
1	8.2°
2	10.0°
3	10.9°
7	10.2°
10	10.2°
20	7.2°
30	6.5°
50	8.2°
70	7.0°
100	6.1°
200	4.9°

With external shock absorber

Size	Rotation adjustment per single rotation of rotation adjustment screw
10	1.4°
20	1.2°
30	1.1°
50	1.3°

The rotation adjustment range for the external shock absorber is ±3° at each rotation end. When adjusted beyond this range, note that the shock absorber's durability may decrease.

Rotation Adjustment

⚠Caution

2. MSQ Series is equipped with a rubber bumper or shock absorber. Therefore, perform rotation adjustment in the pressurized condition (minimum operation pressure: 0.1 MPa or more for adjustment bolt and internal shock absorber types, and 0.2 MPa or more for external shock absorber type.)

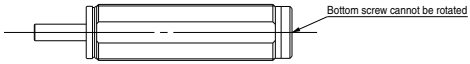
Shock Absorber

⚠Caution

1. Refer to the table below for tightening torques of the shock absorber setting nut.

Size	10	20	30	50	70	100	200
Tightening torque N · m	1.67	3.14		10.8	23.5		62.8

2. Never rotate the bottom screw of the shock absorber. (It is not an adjustment screw.) This may cause oil leakage.



3. When rotation of the rotary table with internal shock absorber is set at a value smaller than the table below, the piston stroke becomes smaller than the shock absorber's effective stroke and energy absorption capacity decreases.

Size	10	20	30	50	70	100	200
Minimum rotation without energy absorption capacity decrease	52°	43°	40°	60°	71°	62°	82°

4. Products with shock absorber are not designed to smooth stop but to absorb the kinetic energy of the load. If the load has to be stopped smoothly, a shock absorber of the optimum size meeting the operating conditions must be installed external to the equipment.

5. Shock absorbers are consumable parts. When a decrease in energy absorption capacity is noticed, it must be replaced.

With internal shock absorber

Size	Shock absorber model
10	RBA0805-X692
20	RBA1006-X692
30	
50	RBA1411-X692
70	RBA2015-X821
100	
200	RBA2725-X821

With external shock absorber

Size	Type	Shock absorber model
10	For low energy	RB0805
	For high energy	RB0806
20	For low energy	RB1006
	For high energy	RB1007
30	For low energy	RB1006
	For high energy	RB1007
50	For low energy	RB1411
	For high energy	RB1412

MSQ Series
Specific Product Precautions 2

Be sure to read this before handling the products. For safety instructions as well as rotary actuator and auto switch precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" of each product on the SMC website: https://www.smcworld.com

Service Life and Replacement Period of Shock Absorber

⚠Caution

1. Allowable operation time under the specifications set in this catalog is 1 million.

Note) Specified service life (suitable replacement period) is the value at room temperature (20 to 25°C). The period may vary depending on the temperature and other conditions. In some cases the absorber may need to be replaced before the allowable operation time above.

External Shock Absorber

⚠Caution

Abrasion powder may be generated from the part where the shock absorber collides with the arm. Do not use the product in a place where abrasion powder may affect adversely.

Speed Controller and Fittings

⚠Caution

Size 1, 2, and 3 use M3 x 0.5 piping ports. When connecting a speed controller or fittings directly, use the following series.

- Speed controller
  AS12□1F/Elbow type
  AS13□1F/Universal type
- One-touch fitting
  One-touch miniature fittings KQ2 series
- Miniature fittings M3 series

Auto switch

⚠Caution

In case of sizes 1, 2, 3 and 7, when 2 pieces of auto switches are installed in one switch groove, the minimum detectable rotation angles are as follows.

Size	Minimum detectable rotation
1	25°
2	25°
3	20°
7	20°

Maintenance and Inspection

⚠Caution

Since sizes 1, 2, 3 and 7 require special tools, they cannot be disassembled.

Since sizes 10, 20, 30 and 50 have the table press fit into an angular type bearing, they cannot be disassembled.
